THE LATEST AXON EVIDENCE RELEASE

New for the March release - ***IP restrictions for API clients, support for additional languages, simulator and community engagement training for VR, Community Request improvements, new Axon Academy courses, and more.***

The March release is scheduled for March 27, 2024.

See the **Full Release Notes** PDF for details, including a list of resolved issues. The Axon Evidence Maintenance Schedule lists the updated schedule times for your region. We don't anticipate any downtime.

The March Axon release is coming soon. Below is a high-level look at the changes, along with a link to the complete release notes with more details.

Take me to the release notes

What's new in Axon Evidence this month
New for the March release -

- **Core platform changes that affect all users** - Restrict usage of a client to a specific set of IP addresses or IP address ranges, support for additional languages, and end-of-life reminder for legacy sign-in.
- **Interview Room Source Filter** - Users can now filter for interview room evidence (Interview) on both the Evidence Search page and on evidence search within a case.
- Exclude in Case Evidence Search
- **Third-Party Video Support** - Several enhancements and expanded coverage for

some format variants.
- **Community Request** - Reporting filter and export feature, expanded portal descriptions, and evidence certificates naming in the audit trail.
- **Upload XT** - More informative error messages, retry failures in-app, faster .zip file creation, case creation permissions enforcement, and Recorded On date UTC offset corrections.
- **Axon Redaction** - Updated AI models for redaction assistants, and inverted redaction mask in Redaction Studio.
- **Axon Partner API updates** - New IP restrictions support for API clients.

Other Axon product updates
See the full release notes PDF for details on the following items.

- **Axon Body 3** - Firmware update version 1.29 includes improved recording stability, general bug fixes and improvements.
- **Axon Body 4** - Firmware update version 1.2408 includes improved Watch Me connection handling, general bug fixes and improvements.
- **Axon Fleet** - Firmware update version 2.2407 including improvements to auto-connectivity, ALPR read/hit processing, general bug fixes and improvements.
- **Axon ALPR** - Configurable Alerting feature for Fleet 3 ALPR organizations provides the ability to configure ALPR hotlist alerting.
- **TASER** - Administration permissions allow a user to search for, reassign, change metadata (e.g. Home, Status, Name), and change the settings for all agency TASER weapons.
- **Axon VR** - Simulator Training Platform 2.0.3/Community Engagement Training 1.2.0 updates include new language support for French Canadian, TASER 10 VR validation course, New user interface for community engagement training, and TASER Arena, an immersive arcade-style VR experience.
- **Axon Academy** - New videos for Axon Performance and Axon Justice
- **Axon Justice** - Beta feature, “quick filters” help to navigate large volumes of evidence and manage download link contacts within the admin panel.
- **Axon Corrections** -Identify the device home (originating facility) for any piece of evidence from the Evidence search page, persistent user search filter, and Camera State availability in the Inventory report.

UI and Accessibility changes
This update includes updates to the user interface for the following features of Axon Evidence. For more information about these changes, please see the appropriate feature sections of the release notes.

- IP Restrictions for API Clients
- Support for Additional Languages

Interview Room Source Filter
- Exclude in Case Evidence Search
- Community Request reporting filter and export feature
- Redaction Studio inverted redaction mask
- Axon Corrections device home now available as evidence metadata

Coming Soon

- **Third-party video** - Adding JPEG2000 codec support for Avigilon Systems .ave exports, and improved playback support for L3 Mobile Vision .qbx and Bosch .avr files.
- **Rate Limiting for API Client Token Creation** - Starting April 2024, Axon will begin a phased reduction of the rate limit for API client token creation in order to optimize performance and ensure system stability.
- **Automatic Account Deactivation** - Will allow agency administrators to specify an inactivity period ranging from 5 to 730 days.
- **Axon Partner API updates** - New guidance for retry requests.
- **Redaction reason activity report** - Users can soon select from a list of default options to clarify why a redaction mask was added.
- **Axon Justice** - New case creation fields with multiple options including 'Court Number', 'Police Number' or 'Internal Number'.
